

To install and launch the "SnapSolutions" application, follow these step-by-step instructions:

1. Prerequisites:

Ensure that Node.js and npm are installed on your machine.

Have a MongoDB instance running.

2. Clone the Repository:

```
git clone https://github.com/shubhampatel11/comp5130f2023/tree/main/SnapSolutions
cd snap-solutions
```

3. Install Dependencies:

For the backend:

```
cd backend
```

```
npm install
```

For the frontend:

```
cd frontend
```

```
npm install
```

4. Configure Database:

Set up your MongoDB connection in the backend configuration file.

5. Start the Servers:

For the backend:

```
cd backend
```

```
npm run start
```

For the frontend:

```
cd frontend
```

```
npm run start
```

6. Access the Application:

Open your web browser and go to <http://localhost:3000> to access the "SnapSolutions" application.
